

Optional Enhancements

BULGE EMBOSSING

Bulge embossing lets us stretch metal cans, raising images up to 15mm from the surface on most kinds types of metal packaging.

METAL MESH

With our mesh technology, you can create intricate, elegant patterns or symmetrical lines on decorative tins and luxury packaging. How you use it is up to you: to show off the product within, or tease consumers with what awaits them inside.

OPENING OPTIONS

We offer a versatile range of opening options for your promotional packaging to maximize consumer convenience and brand interaction.

STACKABILITY

From food cans to wholesale cookie tins to industrial packaging of all kinds, the inherent durability and strength of metal tins make them highly stackable, facilitating warehouse storage, handling and point-of-sale display.

WINDOWS

Drive consumer purchase of confections, cosmetics, alcohol or toys by giving them a peek at the product inside the package, rather than just showing them a picture. Window technologies are available in a variety of substrates, keeping products protected while still allowing them to be easily identified by consumers.
