

Dear Valued Packaging Partner,

On behalf of Empire Emco, I would like to emphasize our dedication to sustainability, and to collaborating with our valued clients and suppliers in the pursuit of environmental and social responsibility. We are committed to protecting the environment and the community.

EmpireEmco places sustainability at its core, and strives to collaborate with our business partners to develop, manufacture and market attractive sustainable products and solutions. Relative to rigid packaging supply, our specific goals are to continually expand the adoption of post-consumer regrind ( PCR ) content in our plastic containers and closures; as well as the adoption of biodegradable resin additives and biodegradable resin options; to optimize lightweighting in engineering our custom designs; and to customize logistics and warehousing programs to minimize impact on the environment.

Our objective is to provide immediate rigid packaging options that meet your needs, protect the environment, and foster collaboration in our mutual pursuit of sustainability throughout our industries. We believe that by working together with our business partners. we can make a significant, positive impact on the environment and society, while achieving our collective business goals.

Thank you for considering our commitment to sustainability. We look forward to the opportunity to collaborate with your company in protecting the environment, and contributing to a sustainable future.

Best Regards,

*Gary Burns*
